Pradipkumar Khuman

pradipkumarkhuman@gmail.com linkedin.com/in/pradipkumar-khuman github.com/pradipkumar271 Amreli, Gujarat

Summary

Full Stack Developer with hands-on experience in MERN Stack development, RESTful APIs, and responsive web applications. Skilled in React.js, Node.js, MongoDB, Python, and AI/ML technologies, with a strong foundation in problem solving and building scalable software solutions.

Education

Parul University **2023 – 2027 (Expected)**
B.Tech in Information Technology, CGPA: 7.97/10 *Vadodara, Gujarat*

Jawahar Navodaya Vidyalaya (JNV), Amreli
Secondary & Higher Secondary Education *Amreli, Gujarat*

Experience

Artificial Intelligence Intern **Aug 2025 – Oct 2025**
EdiGlobe
- Built machine learning models using TensorFlow and OpenCV for **3+** AI-based applications.
- Increased model accuracy by **15%** through preprocessing and training optimization.
- Reduced prediction response time by **20%** using efficient deep learning techniques.
- Collaborated with a team to integrate AI features into real-world applications.

Projects

Trip Planner Web Application | *React.js, Node.js, Express.js, MongoDB* | GitHub **2026**
- Developed a MERN stack application with JWT authentication and REST APIs for efficient trip planning and management.
- Implemented secure user authentication, trip creation, itinerary management, and MongoDB database integration.
- Designed a responsive interface optimized for both desktop and mobile devices.

Auto Mood Detection System | *Python, TensorFlow, OpenCV* | GitHub **2025**
- Developed a real-time facial emotion recognition system using TensorFlow, OpenCV, and deep learning techniques.
- Performed image preprocessing and feature extraction to improve emotion classification accuracy.
- Optimized inference speed for smooth real-time emotion detection from webcam input.

Smart Faculty & Timetable Planner (EduX System) | *React.js, Node.js, MongoDB, JWT* | GitHub **2025**
- Developed a full-stack web application to generate conflict-free academic timetables with a normalized MongoDB schema and dynamic timetable builder.
- Implemented real-time validation to prevent teacher clashes and workload imbalance using constraint-based scheduling logic.
- Built JWT-based authentication, secure password handling, and PDF export functionality for end-to-end usability.

Technical Skills

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Bootstrap, Responsive Web Design
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, OAuth, API Integration
Machine Learning: TensorFlow, Keras, OpenCV, Scikit-learn, Deep Learning, Computer Vision
Data & Visualisation: NumPy, Pandas
Databases: MongoDB, MySQL, SQL
Tools & Platforms: Git, GitHub, VS Code, Postman, Docker (Basics), Agile Development
CS Fundamentals: Data Structures & Algorithms, OOP, CRUD Operations, System Design Basics

Certifications

NPTEL Elite Certification – Computer Networks and Internet Protocol | *NPTEL* | Verify **2025**

ISRO Bharatiya Antariksh Hackathon 2025 | *ISRO* | Verify **2025**

Artificial Intelligence Internship Certificate | *EdiGlobe* | Verify **2025**

Additional Information

Key Skills
- JWT Authentication, API Integration
- Database Management, Team Collaboration

Languages Known
- Hindi, English, Gujarati
